INDEX.

A.

Abau, p. 391
Abstract of the proceedings of the New-York Lyceum of Natural History, 361
Academy of inscription and belles-lettres, at Paris, 386
Account of a travelled stone, 158
Acid, fluoric, 354
—— sulphuric, crystallization of, 186
Alasmodonta, on the genus, 258
Alluvion, 80
Alum, manufactory of at Salem, 372
American Geological Society, 377
Analcime, 224
Analysis of a maganesian garnet, 155
——— of the glassy actynolite of Concord, 331
——— of argentine and crystallized steatite, 333
——— of vegetables, 384
Andalusite, American, 176
Animal Fat, remarks upon, 377
Anthophyllite, 227
Anthracite, fusion of, 353
Apophyllite, 225
Argillite, 35
Asthma, cure of by lightning, 329
———, efficacy of prussic acid in, 366

B.

Barnes, D. H. Mr. on the genera Unio and Alasmodonta, 107, 258
Barytes, sulphate of, 211
Beck, Dr. notice of his Gazetteer, 367
Bellows-Falls, granite of, 11
Beryl, 222
Bismuth, native, 210, 235
Black Mountain, 6
Blowpipe, experiments with, 349
Bodies, Carbonaceous, additional notice of, 379
Boletus Igniarius, observations on, 177
Bones, Fossil, 43

Boué, Dr. his notices of European Geology, 188
Boston Journal of Philosophy and the Arts, 379
Brace, J. P. Mr. his notice of minerals, 250
Brewster, Dr. his memoirs, notice of, 400
Brick making, 396

C.

Cadmia, observations on, 180
Calcareous Spar, 211
Chalcedony } 216
Cacholong }
Calligraphy, 391
Canal, survey on the, 373
Canton of Geneva, 392
Caoutchouc, mineral, 370
Carbonaceous bodies, additional notice of, 379
Ceylon, mineralogy of, 192
Chabasie, 224
Chain bridge over the Menai, 384
Chronometer, cosmogonical, 55
Cleaveland, Prof. his notice of snow-balls, 162
Coal formation, 61
Cobalt, arsenical, mine of, 209, 235
Colophonite, 223
Columbium, 236
Comstock, Dr. notice of his Grammar of Chemistry, 369
Conic Sections, demonstration of a problem in, 280
Conjectures on the probable changes in the Geology of North-America, 98
Connecticut River, mineralogy and geology of the regions on, 1, 201
Conservatory of Arts and Trades, 388
Cooking apparatus, 399
Copenhagen, 390
Copper, mines and veins of, 205
———, pyritous, green carbonate and red oxide of, 206
Corundum, 219
Crystallization of Sulphuric Acid, 186
Cutbush, James, Dr. on the formation of Cyanogen, 149
———, on the properties and formation of the Greek Fire, 302
Cyanite, 219

D.

Daggett, Herman, Rev. his letter on the cutting of steel, by soft iron, 336

Dana, J. F. Prof. his miscellaneous notices, 163
———— his galvano-magnetic apparatus, 330
———— his miscellaneous localities of minerals, 245
Darlington, Wm. Dr. his pluviometrical observations, 326
Datura, Dr. Tully on, 245
Davis, Prof. his demonstration of a problem in conic sections, 280
Dean, James, Prof. his letter on a meteor, 322
Deflagrator, on its relations with the calorimotor and common battery, 337
Delafield, Major, on American Andalusite, 176
Denderah, zodiac of, 200
Description of a new species of Botrychium, 103
———— of a new species of Usnea, 104
Dewey, Prof. his analysis of argentine and steatite, 333
Diamond, experiments upon, 349
Disease, singular, 199
Durham, N. H. rocking stone in, 243
Dykes of greenstone in sandstone, 55

E.

Eaton, Prof. on Boletus Igniarius, 177
———— his communication on Animal Fat, 377
Editor, his letter on the relations between Dr. Hare's galvanic instruments and the common battery, 337—on the fusion of plumbago, 341—experiments upon the diamond and anthracite, 349—fusion of the latter, 349—remarks on the fluoric acid, 354—additional notice of the fused carbonaceous bodies, 378
Egypt, statistics of, 389
Electro-Magnetism, 394
Ether, vaporization of, 396
Euchlorine, preparation of, 164
Expedition of Major Long, notice of, 374

F.

Fasciculate, 226
Fat, animal on, 377
Fine Arts, 390
Fishes, on the limits of their occurrence in high latitudes, 383
Fluoric Acid, 354
Foreign Literature and Science, 197, 384
Formation, coal, 61
Fossil shells, new work on, 197

—— remains, 199
—— vegetables, 381
Fresh water formation, 381

G.

Galena, veins of, 204, 205
Galvano-magnetic apparatus, 330
Garnet, 222
Gas, ammoniacal, inflammability of, 185
Gazetteer of Dr. Beck, notice of, 367
Geest, 83
Geology, 398—conjectures on that of North America, 98—European continental, notices of, 183
Geological survey on the great canal, 373
Geometry, elements of, by M. Legendre, 283
Gneiss, 18—Glandulous, 20
Granger, Ebenezer, Esq. his letter to the editor, 179
Granite, 2—of Bellows-Falls, 11—Graphic, 16—Porphyritic, 16
Greek Fire, on the composition and properties of, 302
Greek Seminary of St. Petersburgh, 387
Greenstone, primitive, 31—secondary, 44
————, dykes, origin of, 56, 59
———— and primitive rocks, juxtaposition of, 58
Griscom, Prof. his foreign extracts, 197, 384

H.

Hall, Prof. his notice of plumbago, 178
———————— of a water-fall, and of excavations in the rocks, 252
Hare, Dr. Robt. editor's letters to him, 337 to 354
Hitchcock, Edward, Rev. his sketch of the Geology and Mineralogy of the regions on the Connecticut, 1, 201—his description of a new species of botrychium, 103—his catalogue of minerals, 201, 236
Hops, 393
Hornblende slate, 20
House of refuge, 387
Hubbard, Thomas, Dr. on the use of the Prussic acid in asthma, 366
Hudson Marble, 371

I.

Ichthyolites, 76.
Ittro-Cerite, 379.

Incrustations, Calcareous, 211.
Inflammability of Ammoniacal gas, 185.
Iron Conduit Pipes, 173.
——, Magnetic and Micaceous Oxide of, 208.
———— Carbonate of, 209.
Iodine, 383.

J.

Jasper, 218.

K.

Keating Wm. H. Mr. his observations upon the Ancram Cadmia, 180.

L.

Laumonite, 224.
Lead mine of Southampton, 201.
Legendre, A. M. his elements of Geometry, 283.
Leipsic, 396.
Letter of Doct. Henry Manning on a meteor, 315.
Limestone, 37.
————, granular, 211.
Lime, Silicate of, Phosphate and sulphate of, 212.
Long, Major, notice of his expedition, 374.
Lyceum of Natural History, New-York—proceedings of, 361.

M.

Magnetism, its connection with electricity and heat, 163.
Manning, Henry, Doct. his letter upon a meteor, 315.
Marble of Hudson, notice of, 371.
Mc'Clure, Wm. Esq. his conjectures on the probable changes in American Geology, 98.
Mead, Wm. Doct. his account of a travelled stone, 158.
Memoir on the Catskill mountains, 86.
Mermaid, 195.
Meteors, 315.
Meteor in Pennsylvania, 316.
Mica Slate, 22.
Mine at Huntington, 210.
Mineralogy of Ceylon, 192.
Minerals, miscellaneous localities of, 245.
Mineral Caoutchouc, 370.
Miscellaneous notices, 163.

Moore, Jacob, Mr. on a rocking stone in Durham, New-Hampshire, 243.
Morton, S. Mr. his notice of an ancient mound, 166.

N.

New-Jersey, notice of the alluvial district of, 237.
Newton's Principia, stereotype edition of, 371.
New Atmometer, 382.
Notice of an ancient mound, 166.
——— of a curious fluted rock, 179.
——— of Doct. Comstock's Grammar of Chemistry, 369.
——— of Mr. Kendall's thermometers, 371.
Nuttall, Thomas, Mr. his reply to Mr. Seybert's letter, 171.

O.

Observations pluviometrical, 326.
Odessa, city of 386.
Opal, 218.
Organic remains, 43.
——— in coal formations, 76.
Orr, Isaac, Mr. on the formation of the Universe, 128.

P.

Paper hangings, 396.
Pennsylvania meteors, 316.
Philadelphia water works, 375.
Pierce, James, Mr. his memoir on the Cattskill mountains, 86.
——————— his notice of the alluvial district of New-Jersey, 237.
Pinite, 219.
Platinum test for, 376.
Plumbago of Ticonderoga, 178.
——————— fusion of, 341.
Pluviometrical observations, 326.
Poland, 390.
Porter, Jacob, Doct. his catalogue of minerals, 246.
Potash nitrate of, 211.
Potatoes, preservation of, 200.
Preparations anatomical, 384.
Prussic acid, its efficacy in asthma, 366.
Pyrope, 222.

R.

Relic unknown, 80

Remains organic, 43
——— in coal formations, 76
——— vegetable, 80
Remarks on the composition and properties of the Greek fire, 302
Rust, preservation from, 398

S.

Sal ammoniac, 395
Salem alum, &c. manufactory of, 372
Salt springs, on the origin of, 242
Salt Petre, 400
Sandstone, old red, 39
Sardonyx, 216
Science, natural—new Journal of, 379
Sea water, colour of, 198
Seybert, Henry, Mr. his analysis of a manganesian garnet, 155
——— vindication of his claim to the discovery of fluoric acid in the condrodite, 168, 356
——— his analysis of the glassy actynolite of Concord, 331
Shillaber, John, Mr. his description of a mermaid, 195
Sienite, 28
Skeletons of the mammoth and elephant, 386
Sketch of the min. and geol. of the regions on the Connecticut, 1, and 201
Slate, hornblende, 20
——, mica, 22
——, talcose, 26
Snow balls, 162
Staurotide, 219
Steam boat, on the lake of Geneva, 385
Steatite, analysis of, 333
Steel, 395
——, cut by soft iron, 336
Stilbite, 224
Stones rolled, 85
——, meteoric composition of, 397
Stuart, J. Mr. his localities of minerals, 249
Sugar from beets, 388
Switzerland, 391

T.

Talcose slate, 26
Taylor Steuben, Mr. localities of minerals, 245

Temperature, mean, at Salem (Mass.) and at Rome, (Italy.) 386
Test, for Platinum, 376
Thermometers notice of, 371
Ticonderoga, Plumbago of, 178
Titanium, red oxide of—Silico-calcareous oxide of, 236
Tonsil, concretion from the, 164
Torrey, John Doct. on a new species of Usnea, 104
Tully, Doct. on Datura, 254
Tungsten, yellow oxide of, 235
Turquois and Lazulite, 382
Translation on natural history, 382
Travels in America, 380

U.

Unio on the genus, 258
Universe on the formation of, 128
Usnea of Dr. Torrey, 104

V.

Vaux, Geo. Mr. on iron conduit pipes, 173
Velocity of sound. 394
Verd antique, 38
Vesuvius, 385
Vindication of Mr. Seybert's claim to the discovery of fluoric acid in the condrodite, 356
Van Rensselaer, J. W. Doct. his notice of fresh water formations, 381

W.

Waterworks of Philadelphia, notice of, 375
Webster, J. W. Doct. his communication of Doct. Boué's notices of European Geology, 188
West or lost Greenland, 382
Winslow, Miron, Rev. his letter on the minerals of Ceylon, 192
Wire drawing, 393

Z.

Zeolite, 224
Zircon, 29
Zodiac of Denderah, 200
